

Guidelines for Basic Labeling Requirements

Every food in packaged form must bear the following labeling information:

1. The common and usual name of the product.
2. A list of ingredients (with sub ingredients) in the order of their predominance.
3. The name and address of the manufacturer, packer or distributor
4. The net weight

Information required by law must be printed in type of sufficient size and prominence to be easily read under the normal conditions of sale and display. The information should be printed on the main part of the label in a color which contrasts with its background. This information must be in English.

Labeling is required when a product is placed into a package form and made available self-serve to the consumer.
